INTRODUCTION

Your clean air partners for over 28 years, ACE fans are the trusted solution for refreshing and revitalising your space. With our focus on innovation, our new line of products is built to exceed your expectations. Whether you are looking to clear the smoke from your kitchen or freshen up your office, our superior technology ensures maximum airflow with minimum noise.

We are committed to sustainability and efficiency so you can enjoy clean air without worrying about energy bills. Backed by our decades of experience we are here to help you breathe easy. Chose ACE and experience the difference.

With an annual production capacity of about a quarter million fans across exhaust fans, wall fans, table fans and pedestal fans we are equipped with cutting edge technology and a skilled workforce, we ensure that every fan we produce meets the highest standard of quality and reliability.

MANUFACTURING PROCESS

Moulding:-

Our in house moulding section is equipped with multiple latest injection moulding machines which are energy efficient, high precision and stable.

Motor:-

Our motor section is equipped with automatic winding machines.

We are known for using 100% copper winding for each and every motor and CRNO stampings for exhaust fans.

Plastic:

We use PPCP, ABS and virgin polymers using master batches for various colours.
